**Maximise reliability. Minimise running costs**

**Innovative, intelligent and scientific cooling, heating and ventilation services**

Nationwide is your local, trusted expert in the design, construction, refurbishment and maintenance of cooling, heating, ventilation and air-conditioning (HVAC) systems.

Our expertise in energy management, superior service, as well as a proactive approach to asset auditing and maintenance sets us apart from your average air-conditioning company.

By being innovative, intelligent and scientific, we help property owners and building managers to maximise the life of their assets and reduce reactive service calls.

## THE TEAM YOU CAN TRUST

Nationwide Air Conditioning is a wholly owned Australian company based in Newcastle, NSW.

We have been a leading provider of air-conditioning and ventilation services across Northern and Western NSW for more than 30 years. With an office in Coffs Harbour and key staff based in the NSW New England, Central Coast and North Coast regions, as well as into Queensland, we have service teams on the ground, conveniently located to promptly service your needs.

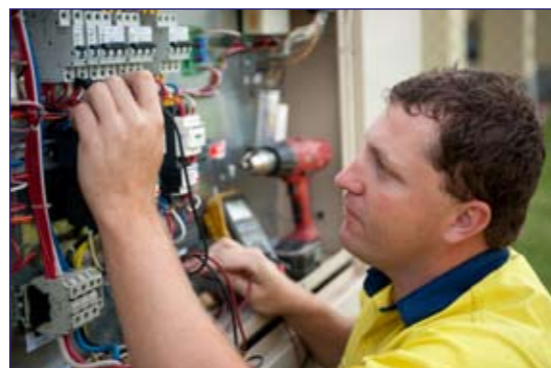

Our joint venture partnership with Sydney based Grosvenor Engineering Group means we can provide state-wide and national services with a consistent, high quality service. The depth of engineering expertise available within our group is unmatched by our rivals.

## INTEGRATED SERVICES

We tailor our superior services to meet your budget and systems needs. Our clients include a range of commercial and Government organisations across a variety of industries. Services include:

- New Design, Installation and Refurbishment
- Programmed General Maintenance
- 24hr Emergency Breakdown Service
- Technical Advice and Project Management
- Comprehensive System Auditing and Reporting
- Asset Life Programs

Design, Construction & Refurbishment  
~ PRO-ACTIVE MAINTENANCE ~

## NATIONWIDE - MORE THAN YOUR AVERAGE AIR-CONDITIONING COMPANY

Three key reasons why Nationwide is the leader in the provision of HVAC services.

### 1 Highly trained, local experts

We employ highly trained, professional engineers, construction managers and technicians who work together across the construction and maintenance fields to deliver our clients cost effective solutions. Having conveniently located staff means we are never far away to undertake prompt maintenance or emergency repairs for you.

### 2 A pro-active, intelligent and scientific approach

The most intelligent way to maximise the performance of your HVAC assets is with proactive maintenance. Our competitive maintenance contracts provide clients with detailed reports and analysis of their system performance. Rigorous, pro-active audits identify any defects as well as timely practical changes to practices and equipment to maximise reliability and minimise running costs and the impact on the environment.

### 3 Technology and systems

Technology plays a big part in air-conditioning maintenance and we lead the way in applying scientific rigour and systems technology to enhance energy efficiency, proactively reduce breakdowns and maximise asset life.

## OUTSTANDING SERVICE

At Nationwide we provide a level of service and workmanship that goes well beyond the industry standard. We treat our clients as lifelong business partners who depend on us to manage their assets as cost effectively as possible whilst keeping building occupants as comfortable as possible.

Each of our technicians spends more than four weeks a year undergoing technical and customer service training.

**We are prompt, efficient, proactive and dependable.**

## DON'T TAKE OUR WORD FOR IT!

"Nationwide provides contract maintenance services to Port Waratah Coal Services. Our Contractor Management System places high expectations on contractors working at PWCS. Nationwide has proven to be capable and adaptable to meet our standards for safety, quality of work, timing, cost, supervision and reporting. We are highly satisfied with their service and competency."
